

The Airmiq range of flexible ducting includes options to suit residential and commercial HVAC applications, including both nude (uninsulated) and insulated types. Designed for easy installation and reliable airflow, our flexible ducts are compatible with all standard ventilation systems.

The nude duct is ideal for short runs in roof spaces or plant areas where insulation isn't required, while the insulated duct is wrapped in a thermal and acoustic barrier to minimise heat loss, condensation, and noise transfer - perfect for conditioned air supply or return.

- Lightweight and flexible for quick installation
- Available in nude (uninsulated) or insulated with foil-faced glasswool
- Reinforced inner core resists tearing and collapse
- Suitable for supply or extract applications

Nude Flexible Duct (3 Zero)		
SKU	Diameter	Length
VSP1074	100mm	3 metre
VSP1070	125mm	3 metre
VSP1073	150mm	6 metre
VSP1072	200mm	6 metre
VSP1075	250mm	6 metre
VSP1071	300mm	6 metre

Nude Flexible Duct (4 Zero)		
SKU	Diameter	Length
VSP1068	150mm	6 metre

Insulated Flexible Duct (R1.0)		
SKU	Diameter	Length
VSP1080	150mm	6 metre
VSP1079	200mm	6 metre
VSP1078	250mm	6 metre
VSP1077	300mm	6 metre
